

# INCOME TAX REPORT

The Nebraska Revenue Act of 1967 established the income tax as a major state revenue source. The state income tax, which was first collected in 1968, includes individual, fiduciary, and corporation income taxes. Revenue from income tax is deposited in the General Fund.

## Individual Income Tax

The Nebraska individual income tax is imposed for each taxable year on the entire income of every resident individual. A Nebraska full-year resident must file a Nebraska individual income tax return if he or she is required to file a federal return and report a federal liability. A state filing is also required if an individual has \$5,000 or more of Nebraska adjustments to federal adjusted gross income, such as state and local bond interest. Nonresident and partial-year resident individuals are taxed on income that is derived from Nebraska sources.

Income tax is calculated as a percentage of Nebraska taxable income using a four-bracket graduated rate schedule. Additional taxes are computed on federal alternative minimum tax and premature and lump-sum distributions from qualified retirement plans at a rate equal to 29.6% of the federal tax amount. Nebraska taxable income starts with federal adjusted gross income, adds

interest from non-Nebraska state and local government obligations, and subtracts U.S. government obligations and other adjustments decreasing income. For 2006, a standard deduction (equal to the greater of the Nebraska standard deduction or the federal itemized deductions less state and local income tax) is allowed. An additional tax which phases out the benefit of lower tax rates in the first income brackets is also computed by higher income taxpayers. The income threshold is \$150,500 in 2006 and will be adjusted for inflation in future years.

The following tables display the tax rates, income brackets, and personal exemption and standard deduction amounts used to determine individual income tax liability for tax years 1988 through 2006:

## Corporation Income Tax

The Nebraska corporate income tax is imposed upon any corporation or any other entity taxed as a corporation (not including a corporation with a valid federal subchapter S election) which is doing business in Nebraska. For a corporate taxpayer subject to tax in another state, the entire adjusted federal taxable income of the unitary business is apportioned according to the statutory formula to determine the portion attributable to sources within Nebraska. For a corporate taxpayer not subject to tax in another state, the entire taxable income is subject to tax in Nebraska. Each corporate taxpayer is required to file one, single combined tax return for each taxable year.

The corporate income tax rate is calculated as a percentage of the primary individual rate.

The primary individual rate is 3.70%. The corporate rate on the first \$50,000 of taxable income is 150.8% of the primary rate and 211% of the primary rate on the excess. The 2006 rates are 5.58% and 7.81%, respectively.

## Fiduciary Income Tax

The fiduciary income tax has two parts. If the estate or trust is set up as a conduit for income distribution to the beneficiaries, income is taxed at the beneficiary level. Where income is retained by the estate or trust, it is subject to tax on its Nebraska taxable income at fiduciary rates. The tax on fiduciaries is calculated using the same rates used to calculate individual income tax, however the income brackets are different. The following table displays the brackets and tax rates for tax years 1988 - 2006.

## Financial Institutions Tax

Every financial institution which maintains a permanent place of business in this state and actively solicits deposits from residents of this state must file a Nebraska Financial Institution Tax Return, Form 1120NF. The Nebraska Financial Institutions Tax is based on the average deposits of the financial institution. The financial institution tax rate for 2005 is 47¢ per thousand dollars of average deposits. The limitation rate is 3.81% of the financial institution's net income before income taxes.

## Partnerships, S Corporations, and Fiduciaries

Partnerships, S corporations, and fiduciaries that distribute their income currently are not subject to state income tax at the entity level. Instead the income from the partnership, S corporation, or fiduciary is distributed to the partners, shareholders, or beneficiaries and reported on the individual or corporate tax return of the income recipient.

Limited liability companies (LLC's) treated federally as partnerships will be treated as a partnership for state income tax purposes. LLC's treated federally as corporations will be treated as corporations for state income tax purposes.

# Statistical Tables

Tables 1 through 9 report tax year 2005 statistical data compiled from the Nebraska Individual Income Tax Return, Form 1040N, as submitted by taxpayers. The amounts shown for Nebraska tax liabilities are net of non-refundable credits.

Totals compiled from Forms 1040N filed by nonresidents and from returns which could not be allocated to a specific county are listed after the county totals in Tables 1 through 3. These amounts from nonresident and unallocated returns are included in the state totals.

## **TABLE 1 - 2005 Individual Income Tax Statistics by County**

Table 1 reports federal adjusted gross income, Nebraska tax table income, calculated Nebraska income tax and selected tax credits by county.

## **TABLE 2 - 2005 Farmers, Ranchers, and Fishermen Income Tax Statistics**

Statistics compiled from returns of taxpayers who designated that their principal income is from farming, ranching, or fishing are reported in Table 2. Income from other sources may be included in these figures.

## **TABLE 3 - 2005 Individual Income Tax Liability by County**

The total number of returns, number of returns with tax liability, and calculated liability are reported by county and by income class in Table 3.
